In this regard, Braintech resells products in the following areas: security, networking, infrastructure management, monitoring, certified data erasure, financial risk, and data quality analysis.

Braintech resell products in several areas, the newest are the following :

Centerity

www.centerity.com

Enterprise-Class Unified IT Monitoring & Business Services Management Solutions

Centerity is designed as an all-encompassing, enterprise-class platform capable of capturing performance metrics from all layers of the monitoring stack including the physical, network, and application layers. An additional synthetic end-user experience layer allows metrics to be correlated and analyzed per defined business processes and Service Level Agreements (SLAs) to give organizations a comprehensive view of IT availability, performance, and status. This includes the holistic monitoring of cloud assets whether in public, private, physical, or virtual environments (VMware, Hyper-V, etc.) and SaaS services.

Service-oriented BSM monitoring is the only integrated, efficient way to view and manage complex, hybrid technology environments in modern businesses and Centerity is the only monitoring solution capable of delivering it. Join us in defining the new rules of business IT monitoring—your rules!

Data Quality

It is an integrated service of methods and tools, to improve the quality of Data of the companies following ISO / IEC 25012 guidelines that help to assess the quality with a reality which is modeled. The ISO/IEC 25012 "Data quality model" evaluates the characteristics of:

- accuracy, understood as perfect compliance with real world that is;
- timely, that is, the right time in which the data is used;
- consistency, so not a given contradictory with other data;
- completeness, present for all necessary attributes;
- credibility, coming from the source certain.

About the team

Carlo De Luca

With thirty years of experience in field of ICT; Carlo was first in Telecom Italy, after in American Express becoming IT Manager where he increased its past international experience, then in Primeur, an integration and security company, where he held various managerial positions for ten years. In 2008, along with other professionals, he founded Braintech of which is currently CEO and sole shareholder.

Nicola De Bello

He got a degree in Electronic Engineering from the University of Padua in 1987, writing a thesis on the prosody of statements in the text-to-speech voice synthesis of the Italian language.. After almost ten years in software development of mission-critical systems for the Telco market (Necsy), in 1994 he founded his first company (Atman), which carried out the first Italian multimedia catalogue on ICD-ROM (for Nordica / Rollerblade). In 1996 Nicola founded ISYI, one of the first Italian Cyber Security companies, acquired in 2000 by the American company ISS (now IBM). In 2003 he founded Sirion, immediately acquired by the Primeur Group. In 2004 he founded Kima (part of the IKS Group since 2009), the first Italian company accredited by the PCI Council in the field of Electronic Payments. Security In 2010 he founded WARE'S ME Nicola boasts in the ICT sector the most important national and international references. He has been in charge of the Braintech security team since 2014.
